- (1) 30-35min for test loads as per NF X30-503-1 standard.
 (2) Cycle times may vary based on the type of materials, waste density, humidity, quantity of liquids, etc. For loads with high liquid content, cycle time can be longer. Up to 50min depending on the waste density.
 (3) Based on an average cycle time of 45min. (40 min. of cycle + 5 min. unloading/loading time).
 (4) Quantity of liquids allowed might vary depending on application (urine bags, blood bags, food testing bags, ...).
 All the data given in this catalogue are non-binding and given as a guide only. Treatment capacities, cycle times and consumptions are given as mere examples and may vary depending on the type of waste, installation conditions, operator's availability and skills.
 Consumption is calculated on the basis of a standard cycle of the machine.
